

Job Title: Manufacturing Fabricator**About Us:**

DIT AgTech is a company dedicated to revolutionising the farming industry through innovative technology solutions. We are committed to tackling the world's most pressing agricultural and climate challenges by creating effective, efficient and sustainable farming practices. Our mission is to empower farmers with cutting-edge tools, knowledge, and resources to help them achieve optimal yields while minimising their environmental impact.

We are seeking an experienced Manufacturing Fabricator to join our Townsville manufacturing facility. In this hands-on role, you will be responsible for manufacturing cages, trailers, and mixing equipment. Additionally, you will participate in product development and assist the tech production team in assembling our dosing units. The ideal candidate will have a strong background in fabrication and welding, with the ability to contribute to both production and innovation. We also offer permanent residency pathways for the right candidate.

Key Responsibilities:

- Fabricate all of the companies' cages, trailers, on site mixing equipment and metal equipment needed to assist our tech devices to operate
- Be responsible for the timely manufacture of all fabrication
- Effectively communicate to the production manager the materials and tools required to manufacture the equipment
- Assist our technology manufacturing team when required
- Actively contribute to product improvements
- Promote a safe workplace

Skills and Experience:

- Certified Boilermaker / Sheet Metal Worker (highly desirable)
- Ability to work autonomously and think strategically
- Forklift license (essential)
- Written & verbal communication skills of a high standard
- Ability to use sound judgement
- Manage deadlines and targets
- Confident and mature approach
- Trade qualified or equivalent comparative skills
- Past manufacturing of liquid mixing equipment (highly desirable)
- Vast experience welding different metals especially used for agricultural operations
- A basic understanding of electrical componentry (highly desirable but not essential)
- This position involves heavy lifting and manual labour

How to Apply:

Send a resume and cover letter to ally@ditech.net.au, or call Ally Gravolin on 0428754373 for further information.
