

Job Title: Research & Development Lead**About us:**

DIT AgTech is at the forefront of innovation in livestock nutrition and agtech solutions. We specialise in delivering cutting-edge IoT-enabled dosing systems and methane-reducing supplements that help producers improve livestock health, productivity, and sustainability. As a fast-growing company with a strong customer-first culture, we are committed to providing solutions that make a real difference on-farm.

We're now looking for a **Research & Development Lead**. The role will be based on-site at our Toowoomba/Gatton Production Facility to support the development, validation, and continuous improvement of our livestock nutrition products and delivery systems.

The Opportunity:

As our **Research & Development Lead**, you'll be responsible for leading livestock nutrition research, driving product development, and delivering scientifically validated outcomes that support both product performance and customer success. You'll play a key role in shaping the future of our supplement range while working closely with customers, sales teams, and industry stakeholders.

What You'll Do:

- Develop and execute livestock research projects to validate the efficacy of nutritional supplements delivered via the uDOSE™, ensuring evidence-based outcomes.
- Analyze and interpret data, preparing detailed reports to support research claims.
- Stay up to date with industry trends, research, and innovations in livestock nutrition.
- Design and develop new livestock supplements to be delivered through the uDOSE™ and improve existing DIT AgTech diet supplements based on market needs and scientific insights.
- Lead product development to ensure effectiveness that will result in customer satisfaction.
- Provide nutritional advice/support to the Sales team and customers, ensuring accurate and valuable information is shared.
- Collaborate with customers to understand their needs and gather feedback for product refinement.
- Lead the livestock R&D team, fostering a culture of creativity and scientific rigor.
- Manage livestock R&D projects, ensuring timely delivery and alignment with company objectives.

What You'll Bring:

- Proven expertise in livestock nutrition and supplementation.
- Strong understanding of scientific research procedures, including experimental design, data collection, experience with statistical software (R and/or SAS or other) and analysis.
- Excellent written and verbal communication skills, with the ability to present findings to diverse audiences.
- Experience collaborating with external stakeholders, such as research organizations and customers.
- Problem-solving skills and a proactive approach to identifying and addressing challenges.

- Ability to develop industry networks in government, commercial and universities
- Excellent personal presentation skills and ability to communicate effectively
- A high level of computer skills

Qualifications and Licences:

- Tertiary Qualification in Animal Science (Animal Nutrition) or related disciplines
- Manual Drivers Licence

Why Join DIT AgTech:

At DIT AgTech, we offer a dynamic and supportive work environment, competitive salary and sponsorship opportunities. You'll have the opportunity to make a meaningful impact in the world by contributing to the advancement of sustainable agriculture and climate solutions.
